

### Log in/Out and Navigation

1. The plan for this chapter will be to learn about:
  - Log in/out from ePEARL.
  - Navigating in ePEARL
2. At the beginning of the year the teacher will give out usernames and passwords. The sub-administrator of ePEARL in your school will be able to provide these.
3. Let's get started! A student enters his username and password as assigned to him. Then, he clicks **login**. If he entered his information properly, he should be on his portfolio homepage. To log out properly, a student should use the **Logout** button at the top right corner of the home page.
4. A student should use the software navigation buttons in the ePEARL window rather than the browser's. For example, if a student is in the Artifact index page and wants to go to **Home**, she would click on the **Home** icon to come back to this page.
5. She can always know where she is by looking at the **crumbs** at the top left corner. This will also tell the student if she is in her own portfolio or viewing someone else's.
6. When a new window is opened (for example when Meg is viewing Einat's portfolio, she uses the **Close Window** button located in the same place to close Meg's portfolio and return to hers.
7. In this chapter you learned about:
  - Log in/out from ePEARL.
  - Navigation in ePEARL.

Now it's your turn! Open your demo account and practice!

You can also print the instructions by clicking on the **print** button.
